

	<p>This software is OSI Certified Open Source Software. OSI Certified is a certification mark of the Open Source Initiative.</p>
---	---

More information and source code for this program can be found at

<http://www.bellsoft.net/>

Features:

- Small and Compact, will not eat system resources.
- Compatibility, runs on any Java enabled system.
- Easy to use.
- Converts almost anything. See table below for complete list of conversions.

<i>Volume</i>	<i>Temperature</i>	<i>Capacity</i>	<i>Length</i>
Cubic Inches	Fahrenheit	Teaspoons	Inches
Cubic Feet	Celsius	Tablespoons	Feet
Cubic Yards	Kelvin	Fluid Ounces	Yards
Cubic Millimeters		Cups	Chains
Cubic Centimeters		Pints	Furlongs
Cubic Decimeters		Quarts	Miles
Cubic Meters		Gallons	Millimeters
		Pecks	Centimeters
		Bushels	Decimeters
		Barrels	Meters
		Milliliters	Decameters
		Centiliters	Hectometers
		Deciliters	Kilometers
		Liters	

<i>Area</i>	<i>Mass</i>	<i>Computer Measurements</i>
Square Inches	Grains	Bit
Square Feet	Ounces	Byte
Square Yards	Pounds	Kilobyte
Acres	Short Tons	Megabyte
Square Miles	Long Tons	Gigabyte
Square Millimeters	Grams	Terabyte
Square Centimeters	Kilograms	Petabyte
Square Meters	Metric Tons	
Ares		
Hectares		
Square Kilometers		

Requirements:

Java 1.4 or above

Whats new:

- ◆ Complete rewrite from version 1.x.
- ◆ Will run on nearly any platform.
- ◆ More reliable.
- ◆ All known memory leaks, including one major closed.
- ◆ New convert on enter feature. Just enter the amount to convert and press enter.

Notes:

There is no for downloading and using the program or sources, but feedback comments and suggestions are recommended.

Bug reports are necessary if this software is to improve. We offer a automated bug report form to make reporting bugs easy.
